To Whom It May Concern

Professional Reference: Sneyd Construction

Sneyd Construction have recently [September 18] completed a 860K build of a Teacher and Learner Pool at Sandon Primary Academy. The entire process from the point of the award of the tender to completion was professional and efficient throughout.

Working within a school environment of paramount importance to Sneyd Construction was the awareness of safety across the site and with this the need to recognise the school safeguarding arrangements. As a consequence risks to both site and school safety were not at all compromised during the build.

As an established local company, the Trustees of the Academy were pleased to see that the vast majority of contractors and professional partners used by Sneyd were from the local area. In addition it was evident that Sneyd Construction hold an excellent reputation with trade and industry partners across the City.

Communication between the contractor and the Academy was a fundamental aspect of the projects success. Regular meetings to update on progress and to identify any potential delays ensured that the school community were fully on board at all stages of the build. Of note the written documents that were presented during the update meetings were of a very high standard.

When undertaking building improvement or development, for school leaders it is key that it does not add to the day to day pressures of school management. Our recent yearlong project caused minimal disruption to the running of the school and of the site with the contractor putting the needs of the school at the centre of the build.

I would unreservedly recommend Sneyd Construction and reiterate their knowledge of school settings and safeguarding procedures.

Kind regards

Mrs Rachel Beckett
Principal
